Hybrid Hunter 25-0178D - Thermo Fisher Scientific

The Hybrid HunterŽ Two-Hybrid System is based on the interactive trap system originally developed by Roger Brent and coworkers (Golemis et al, 1996; Gyuris et al, 1993) All two-hybrid or interaction trap systems exploit the fact that transcription factors are comprised of two domains, a DNA binding domain (DBD) and an activation domain (AD)

Fully integrated hybrid silicon two dimensional beam scanner

demonstrated on the hybrid silicon platform with the laser, amplifiers, phase tuners, and phased array all integrated and fabricated on-chip by Doylend et al [7-9], but thus far 2D steering using an on-chip laser has not been achieved In this paper we present the first fully ...

The two-hybrid system: an assay for protein-protein ...

The two-hybrid system is highly sensitive, and can detect interactions not revealed by other methods For example, interaction of the mammalian Ras protein with the protein kinase Raf was observed in the two- hybrid systemS, but had not been detected by co- immunoprecipitation

Hybrid Electric Systems: Goals, Strategies, and Top ...

A two-mode hybrid system enables high performance and fuel economy over a range of conditions by allowing the vehicle to function optimally in two separate modes: low speed/light load and high speed/heavy load Two-mode hybrid buses achieve up to 50% better fuel economy than conventional buses Recently, the same technology was applied to
