Abstract: Diesel oxidation catalysts promote chemical oxidation of CO and HC as well as the organic fraction (OF) of diesel particulates. They also oxidize sulfur dioxide which is present in diesel exhaust from the combustion of sulfur containing fuels. The oxidation of SO₂ leads to the generation of sulfate particulates and may significantly increase total particulate emissions despite the ...

Will driving a petrol or diesel car become more expensive? In the run up to the sales ban on new petrol and diesel cars, the government might decide to speed up electric car take-up. As well as financial incentives for electric car ownership, it can increase the cost of running internal combustion engine cars.
