I previously routinely used USS for eFAST and periodically for vascular access. I highly recommend the 5 day Introduction to Emergency Medicine ultrasound course. Even though I have previously had one day training courses, I have not followed up with ongoing learning or consolidation of the finer aspects of what I had learned.

Medical Imaging Modalities. Ultrasound technicians differ from radiologic technicians who perform X-rays, MRIs and CT scans in that their equipment employs sound waves instead of radiation. Despite this difference, their work often compliments one another. For example, a radiologic technician will often take a mammogram of the breast in conjunction with a sonographer performing an ultrasound.
